

NAGMAT

Software Engineer • Palo Alto, CA

Backend & distributed systems ? Java / Spring Boot, Python, Kubernetes, AWS

Contact: nagmat1@icloud.com • linkedin.com/in/nagmatn

ABOUT

Software engineer with ~9 years of experience building backend services and data-intensive systems. Currently at JPMorgan Chase Corporate Technology, working on Java/Spring Boot microservices, REST APIs, PostgreSQL, and CI/CD.

Previously: programmable-networking and HPC research (P4 / Intel Tofino) at UT Arlington and University of Nevada, Reno; ML anomaly-detection internship at Lawrence Berkeley National Lab (ESnet); eight years building production systems in Ashgabat, Turkmenistan ? including a national passport system serving 6.4M+ records still in production.

Education: MS Computer Science & Engineering, Seoul National University.

Certification: AWS Certified Cloud Practitioner (2026).

FOCUS

? Backend services at scale ? Spring Boot, REST APIs, Pactflow, SonarQube

? Infrastructure & cloud ? Docker, Kubernetes/EKS, ECS, EC2/S3, Jenkins

? Programmable networking ? P4 on Intel Tofino, in-network caching

? Data & ML ? anomaly detection on network telemetry, Python pipelines

TECH

Java, Spring Boot, Python, PostgreSQL, MySQL, Docker, Kubernetes, AWS, Linux, Jenkins, Git, P4, Microservices, REST APIs

OPEN TO

Backend / distributed systems / platform engineering roles in the Bay Area (contract, contract-to-hire, or permanent).
